IBRAHIM DAWER

MERN STACK DEVELOPER

Profile

Full Stack Developer with hands-on experience building and maintaining web apps using MongoDB, Express, React, Next.js, and Node.js. Skilled in crafting RESTful APIs, designing responsive UIs, and optimizing databases for performance and scalability. Proficient in Git & GitHub and committed to writing clean, maintainable code.

Projects

E-commerce Store

Full Stack Development

- Built a full-stack eCommerce web app with separate user and admin dashboards, secure routing, and role-based access control
- Developed admin features for adding, editing, and deleting products, tracking sales, and managing inventory in real-time

Realtime Chat Application

Full Stack Development

- Built a real-time chat application using Socket.io with live messaging, online/offline status indicators, and global state management via Zustand
- Integrated 30+ customizable themes using DaisyUI, with Cloudinary-powered image uploads for seamless media sharing

Admin Dashboard for a Travel agency

Frontend Development — For a Web Development Agency

- Built a responsive admin dashboard with multiple dynamic pages and interactive forms for efficient content and data management
- Implemented light/dark mode toggle and ensured mobile-friendly layouts for a consistent user experience across all devices
